

FACT SHEET

Bell 429

The Bell 429 Global Ranger is a twin-engine helicopter built by Bell Flight in the US. Our HB-ZYI is a VIP version in a decent phantom-grey livery and equipped with latest technology and finest interior. The fixed landing gear enables it to land on softer ground than the wheeled gear version, hence granting our customers an optimal flexibility in the choice of landing sites. We would be happy to advise you personally and organize everything for your trip including ground transportation from and to the helicopter.

The elegant and yet functional shape of the Bell 429 allows it to reach a cruise speed of 280 km/h.

Our HB-ZYI at a glance:

- Year of manufacture YOM: 2021
- Twin engine (PW207D1), each delivering 635 hps
- Equipped for VFR and IFR flights
- Scope of Operation: VIP- and Taxi flights
- Max. Passenger capacity: 7
- Max. Range: 720 km
- All seats are equipped with Bose A20 ANR Headsets and grant optimal comfort
- The seats in the PAX compartment can either be fitted in a row or as a lounge
