

Robinson R44

The Robinson R44 is a light four-seat helicopter, manufactured by Robinson Helicopters. It is worldwide well-known and appreciated for its agility and is mainly used for flight training, tour- and taxi flights as well as for agricultural work. Our HB-ZMM is exclusively used for School-, Tour- and Taxi flights and hence convinces with a neat interior. We would be happy to advise you personally and organize everything for your perfect Tour- or Taxi flight including ground transportation from and to the helicopter.

Since 1999, the Robinson R44 has been the most selling helicopter on earth every year.
